Telework of Belgian cross-border workers: extension of tax agreement

Luxembourg has agreed to extend the tax agreement with Belgium **until 31 March 2022**[1]. The two countries have also agreed that if the agreement is not denounced by one of the competent authorities **at least two weeks before 31 March 2022, it will be extended by tacit agreement until 30 June 2022.**

Thus, the days of telework performed continue not to be taken into account for the calculation of the tolerance threshold for tax matters (34 days as from 1st January 2022[2]).
